

Portfolio Commentary

Large Cap Value Equity

Q1 | 2019

MARKET REVIEW

U.S. stock markets rallied during the first quarter, rebounding from the fourth quarter's losses, though higher-beta growth stocks generally outperformed value stocks in the upswing momentum. The Russell 1000® Value Index rose +11.93% with gains across all sectors, led by industrials (+18.69%), information technology (+18.46%), energy (+16.61%), and real estate (+16.52%).

Stocks were lifted by major sentiment reversals on a number of macro issues that had been weighing on shares. The Federal Reserve moved to alleviate fears it was moving too quickly with monetary tightening by taking a more neutral stance and assuring investors it would employ a patient, data-dependent approach to any future rate increases. The U.S. and China also appeared to be close to reaching a trade deal. Additionally, while global economic growth continued to show signs of late-cycle slowing, investors were comforted by China's expanded fiscal stimulus as well as signals of more-accommodative policy from the European Central Bank if needed.

PERFORMANCE

For the quarter, the Ceredex Large Cap Value Equity Composite's return of +11.83% (gross)/+11.63% (net) underperformed the Russell 1000 Value Index's return of +11.93%, with energy, healthcare, and communication services stock selection detracting from performance. Information technology and financials stock selection and an overweight industrials position were additive to returns.

Microchip Technology and Zimmer Biomet Holdings were among the strongest stock contributors to performance.

- Semiconductor manufacturer Microchip Technology sharply rebounded after being broadly oversold in the fourth quarter. Investors were attracted to the company's higher-than-expected earnings and revenues and its healthy fundamentals. We capitalized on the gains by selling our position, as the stock reached our price target.
- Medical device company Zimmer Biomet Holdings also roared back in the market rally on earnings strength. In addition, the firm received FDA clearance for its ROSA® Knee System for robotically assisted knee replacement surgeries and its ROSA® ONE Spine System for robotically assisted spine surgeries, positioning it for tremendous earnings potential. We added to our position, given the firm's upbeat fundamentals and low multiples.

Health insurance stocks Cigna and Humana were among the largest detractors from performance.

- Cigna and Humana both lagged on headline risk around issues such as Senator Bernie Sanders' calls for Medicare-for-All and the Trump administration's proposed changes to how prescription drugs are priced and paid for in Medicare. At this point, this may be political noise in the marketplace, and it remains unclear if any of these proposals will begin to gain real traction. We took advantage of the price weakness in both stocks to add to our positions based on the firms' strong fundamentals.

PORTFOLIO CHANGES

Notable new positions added during the quarter included Fidelity National Information Services and Omnicom Group.

Noteworthy exits included Allstate. In addition to previously mentioned Microchip Technology, we also sold Mondelez International, Rockwell Automation, and UnitedHealth Group after these stocks reached our valuation targets.

- We bought financial services technology firm Fidelity National Information Services after the stock appeared oversold due to its European bank exposure. The firm is a major outsource provider of back office transaction processing, with roughly 80% of its business consisting of recurring revenue. The company's recently announced acquisition of Worldpay also helps further expand its offerings into a full product suite.
- We repurchased advertising firm Omnicom Group after selling it last year. The stock's attractive valuation should offer solid upside as businesses start to invest in their brands again to help drive stronger organic growth after years of underspending.
- We sold insurance provider Allstate as auto insurance industry dynamics have largely flattened out.

OUTLOOK

Our outlook remains generally confident, if slightly cautious. Company growth rates are showing signs of late-cycle slowing, and many are coming off extraordinary profitability boosts from last year's corporate tax cuts. As such, current earnings are likely to be broadly more muted and further pressured by the recent trade war, partial government shutdown, and harsh winter weather.

Headline distractions aside, stock fundamentals overall remain fairly solid. Inflation is contained. Employment is strong, and unit labor costs are declining on productivity gains. Market expectations have also largely shifted from global recession fears to expectations of greater accommodation from major central banks. This can all provide a constructive environment for steady, if more subdued, gains. Still, given broader market uncertainties, we will be paying particularly close attention to company guidance this reporting season to see how management teams are navigating the slower growth climate.

*eVestment Alliance (eA) is a manager-reported database on hundreds of investment managers and thousands of investment products covering a full range of asset classes, investment styles, and geographic concentrations. Based on manager input, eA independently constructs universes using qualitative and quantitative factors. The investment products are organized into peer groups and assessed on an ongoing basis to ensure the consistency of a product's attributes within a designated style classification. In addition, eA utilizes style analysis tools, performance analytics, and the review of a product's investment strategy narrative in the construction of wide-ranging universes that are both pure in style and consistent over time.

The eVestment Number of Portfolios represents the number of investment products included in the calculation of the median return for the given eVestment universe for the given time period. Individual investment managers may have more than one investment product included in the universe, so the number of observations will likely be greater than the actual number of investment managers represented.

HOLDINGS DISCLOSURE

The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed do not represent an account's entire portfolio and in the aggregate may represent only a small percentage of an account's portfolio holdings.

It should not be assumed that any of the securities transactions or holdings discussed were or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein.

Dividends reflect past performance and there is no guarantee they will continue to be paid.

IMPORTANT RISK CONSIDERATIONS

Equity Securities: The market price of equity securities may be adversely affected by financial market, industry, or issuer-specific events. Focus on a particular style or on small or medium-sized companies may enhance that risk. **Value Stocks:** Value stocks are subject to the risk that the broad market may not recognize their intrinsic value.

Ceredex Value Advisors LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Ceredex has been independently verified for the period March 31, 2008 (the date of the Firm's founding) through December 31, 2018. A copy of the verification report is available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

- Ceredex Value Advisors LLC ("Ceredex") is an SEC-registered investment adviser and is a wholly owned subsidiary of Virtus Partners, Inc., a wholly owned subsidiary of Virtus Investment Partners, Inc. ("Virtus"). Registration of an investment adviser does not imply any level of skill or training. Ceredex manages assets on behalf of institutional and retail separate accounts and mutual funds. Ceredex became an affiliate of Virtus effective June 1, 2017, when Virtus acquired RidgeWorth Capital Management LLC and RidgeWorth Investments ("RidgeWorth"). Ceredex was created March 31, 2008, when all of the investment decision-makers associated with the value equity investment strategies of RidgeWorth became employees of Ceredex. The staff and decision making process remained intact and independent within Ceredex. For composite reporting purposes, the Firm is defined as all equity portfolios managed by Ceredex. Composite performance results are linked to performance history generated at RidgeWorth.
- The Large Cap Value Strategy composite includes fully discretionary separately managed investment accounts and registered and unregistered mutual funds managed in accordance with the large cap value style with the objective of producing long-term capital appreciation and income. Under normal circumstances, Large Cap Value portfolios will have at least 80% of their net assets invested in U.S. traded equity securities of large cap companies. U.S. traded equity securities may include American Depositary Receipts ("ADRs"). Ceredex considers large cap companies to be companies with market capitalizations similar to those of companies in the Russell 1000 Value Index. In selecting investments for the portfolios, Ceredex chooses companies that it believes are undervalued in the market relative to the industry sector and the company's own valuation history. Prior to September 1, 2015, the gross of fee return for the mutual fund was calculated by adding back the fund's published total operating expense ratio to the net of fee mutual fund performance; we now use the gross of fee return of the underlying portfolio. A complete description of the composite is available on request.
- The benchmark for the Large Cap Value Strategy composite is the Russell 1000® Value Index, which is composed of the securities in the Russell 1000® Index with a less-than-average growth orientation. Companies in this index generally have low price-to-book and price-to-earnings ratios, higher dividend yields, and lower forecasted growth values. The index is calculated on a total-return basis with dividends reinvested. Index returns do not reflect the deduction of any fees or expenses.
- The three-year annualized standard deviations for the composite and the benchmark index are calculated using monthly returns.
- Valuations and returns are computed and stated in U.S. Dollars.
- Beginning March 31, 2008, composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow of 10% or greater of portfolio assets.
- The dispersion of annual returns is measured by the equal-weighted standard deviation of portfolio returns represented within the composite for the full year. No dispersion is reported for periods with five or fewer portfolios (shown as N/A).
- Returns are calculated based on total return which (a) includes cash returns, realized and unrealized gains plus income; (b) utilizes trade date and accrual accounting; and (c) is after the deduction of actual trading fees and expenses. Portfolio returns are calculated utilizing daily valuation. Composite returns, calculated monthly, are the weighted average return of the underlying portfolios using beginning-of-period market values. Composite gross of fee returns do not reflect any deduction for investment advisory fees, custodial charges or other costs that a client might incur in connection with the management of an account. Composite net of fee performance is calculated assuming a fee of 0.75%, the highest fee for this type of investment account.
- The standard management fee schedule applicable to large cap equity accounts is as follows: 0.75% on the first \$10 million, 0.45% on the next \$40 million, and 0.25% on all over \$50 million. The minimum annual fee is \$10,000. Actual investment advisory fees incurred by clients may vary.
- This composite was created March 31, 2008, the inception date of Ceredex, and continues the investment strategy of a composite originally created in 1998. The Composite has performance history with an inception date of July 1, 1998.
- The minimum portfolio size for the Large Cap Value Strategy composite is \$500,000. For further information on investment management fees, please refer to Form ADV Part 2.
- Policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request.
- A complete list and description of firm composites and performance results is available upon request.
- Past performance is not indicative of future results and no investment is guaranteed for return of principal and/or return on investments. Results will vary among accounts. All information provided and used in calculations is believed to be correct, but accuracy cannot be guaranteed. Please consult with a financial professional before investing.
